

My name is Jawad Ahmad, and I'm a drummer and singer/songwriter. Although my parents weren't musical themselves, they had a huge collection of music which was always on in the background while I grew up. This exposure has influenced me to the degree that music has become an obsession of mine. It's hard to imagine my life without it now. I don't only play drums and sing, however: I also play guitar and piano, and am taking up mandolin right now too! You can find more of my songs here: <http://jawadahmadmusic.com/compositions.html> But this isn't a blog about music theory lessons, nor is it a personal site for me to share my music with you. It's a blog about how I am taking over the world. No, I'm not being egotistical - it's simply a matter of fact! In this blog, I will demonstrate how any individual can get what they want out of life by applying principles of psychology and persuasion. This is one of many online courses that help you understand the psychology of influence and persuasion to help build your career (and also your relationships). To see more detailed information go here: <http://www.theinfluencemachine.com/free-training>. I've been doing research on these topics for a long time, and have shared some of this content publicly on my site for many years. I've also shared some tactics that can help people get what they want online here: <http://jawadahmad.com/how-to-get-anything-you-want>. Now I'm going to start writing about it more in depth, and in a more structured manner. At some point, the blog will be the full course, but for now it's a collection of lessons written to help you get a basic understanding of this information. I'm not trying to sell you anything. I'm not a guru or a coach, and I won't be able to guarantee that you will become an overnight success. You have to work hard for your results. The methods that follow are just tools that are meant to help you get what you want out of life - happiness, financial security, increased productivity, motivation, improved relationships with others, exercise, health, something good in the news... You will have no idea how it works because it's based on all sorts of psychology experiments and studies - read the studies if you don't believe me! But this isn't about being gullible either. This is about taking advantage of discoveries about human behavior and psychology to achieve your goals. This is NOT a scam, this is not fake, and it won't cost you a penny to implement. Most people's lives would improve dramatically if they adopted the following principles: What if you could help yourself by making changes that would permanently improve your life?

I've set up a blog for this purpose: <http://theinfluencemachine.com/blog>. The contents of this section will be moved there soon; at least the free content.
